FUZHOU:  
A LAND OF BLESSINGS,  
A CITY OF HAPPINESS

01 »»

**Fuzhou is a city of luck with unique ecological conditions. I hope this seaside and hillside city can become better and offer greater benefits to its people.**

**- Xi Jinping**

**STICKING TO THE IDEOLOGICAL ESSENCE OF THE "3820" INITIATIVE, ACCELERATING THE DEVELOPMENT OF A MODERN SOCIALIST CITY WITH INTERNATIONAL INFLUENCE**

Fuzhou deeply implements the spirits of the important speech of President Xi Jinping during his trip to Fujian, sticks to the essential philosophies of the "3820" Initiative and facilitates the development of a modern international city by preferentially developing "Six Key Towns" and "five international brands" and taking nine special actions. Measures are being taken to turn President Xi's blueprint for Fuzhou into reality.

● Banks along the Min River

## OVERVIEW

Fuzhou is the capital city of Fujian Province and also known as Rongcheng, Sanshan, Zuohai, Yecheng and Mindu and "Rong" for short.

It is located in the southeast of China, east of Fujian Province and along the downstream banks of the Min River. It borders the East China Sea on the east, Nanping and Sanming on the west, Ningde on the north and Putian on the south and is right opposite to Taiwan across the Taiwan Strait.

It has 6 districts, i.e. Gulou, Taijiang, Cangshan, Jin'an, Mawei and Changle, 1 county-level cit, i.e. Fuqing, and 5 counties, i.e. Minhou, Lianjiang, Minqing, Luoyuan and Yongtai, within its jurisdiction.

## A LIVABLE CITY OF PICTURESQUE LANDSCAPE

As a waterside and hillside city, Fuzhou has rich mountain, sea, river, lake and hot-spring resources.

Fuzhou had 364 days with conforming air quality in 2020, with a conformity rate of 99.5% and ranking the 8th among 168 key Chinese cities and the 3rd among provincial capital cities. Its drinking water sources had a conformity rate of 100% and its forest coverage rate reaches 58.36%, ranking the 2nd among provincial capital cities.

Fuzhou has 116 parks and greenbelts in the downtown area. Its six districts have 1,059 small interconnected parks, including riverside, roadside and intra-community parks, with a greening rate of 45.40% in its urban area.

## PREFERENTIAL POLICIES, DISTINCTIVE ADVANTAGES

Totally 44 preferential policies have been introduced successively to foster leading enterprises, encourage foreign investment and promote stable growth of the service industry, e-Commerce industry, digital economy and featured modern agriculture, covering the three major industries of agriculture, manufacturing and modern service and offering assurances in land management, talent attraction and supply of other elements.

## SMOOTH AND COMPREHENSIVE TRANSPORTATION NETWORK

After years of development, Fuzhou has established an integrated system of seaway, landway and airway transportation.

- National comprehensive transportation hub**
- Carrier city of the national logistics network**
- Southeast-based city with national influence and global accessibility**

● Changle International Airport: the international airport with the best clearance conditions nationwide

A HOT LAND FOR INVESTMENT WITH DISTINCTIVE ADVANTAGES

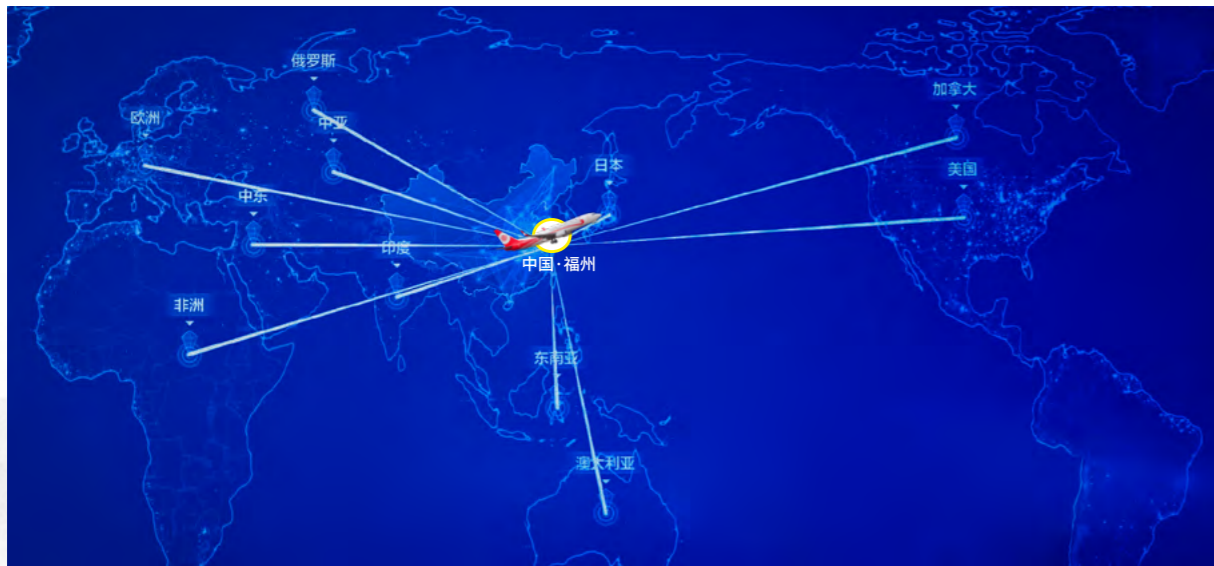

There are 119 domestic and international routes with 94 waypoints.  
The passenger throughput reached 14.76 million passenger trips in 2020.

With 152 working berths and 67 deep-water berths in a capacity of over 10,000 tons, Port of Fuzhou has routes linking to 40+ countries and regions.  
In 2020, Port of Fuzhou had a cargo throughput of 249 million tons and a container throughput of 3.52 million TEUs, including 293,500 TEU for direct shipping to and from Taiwan.

A radiative railway network that comprises HeFu, WenFu, FuXia, XiangPu and FuPing Motorways and high-speed railways. Metro No. 1 and 2 have been launched into operation. Metro No. 5 is under construction. A "cross + circular + radioactive" rail traffic network will be established in the future.

Main coastal ports of China, important regional transportation hub.

**91**

Listed enterprises

Total import and export value

**250.28** billion Yuan

**2052** State-level hi-tech enterprise

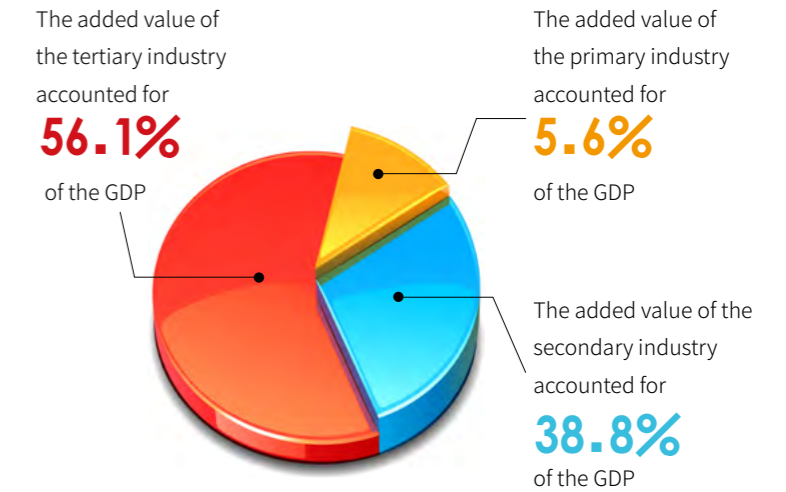

**45** Top 100 enterprises of Fujian

about 1/2 of the provincial total

Total industrial output of enterprises above the prescribed scale exceeded 1 trillion Yuan

**1.0695** billion Yuan

Fuzhou entered a new phase of quality economic development during the "thirteenth five-year period", with the driving force changed from investment into the combo of investment and consumption. Its GDP grew by over 500 billion Yuan and exceeded 1 trillion Yuan (1.002 trillion Yuan) in five years. Great efforts were taken to aggressively promote service mode innovation and cross-border merger, increase the quality and efficiency of economic development and continuously enhance the general strength.

## TWELVE 100BILLION-YUAN-VALUED INDUSTRIAL CLUSTERS

## STRATEGIC EMERGING INDUSTRIES

Successfully held four sessions of "Digital China" Summit; the construction of China Southeast Big Data Industrial Park, Mawei IoT Industrial Base and other projects is being accelerated.

Biopharmacy, genetic engineering medicine, genetic diagnostic reagent, chemical active pharmaceutical ingredients, modern TCM, medical instruments, biomedical analytical instruments and other medical and pharmaceutical sectors.

It is the priority of the restructuring and upgrading of the automotive industry of Fuzhou. A new-energy vehicle production chain, primarily including Soueast Motors, and industrial chains that include Guancheng Ruimin, Xucheng Technology and Wanrun Automotive Power Assembly have been established.

Fuzhou's new chemical material industry has an enormous potential and a series of leading enterprises have come into being, including Wanhua Chemical, Highsun Holding, Zhongjing Chemical, Southeast Electrochemical, Tianchen Yaolong and Kuncai Chemical. A refined chemical industrial chain that has the new chemical material industrial parks at Jiangyin of Fuqing and Kemen of Lianjiang as the main carriers has been established.

The nuclear power industry that has Fuqing Nuclear Power as the representative enterprises and the wind power industry that has Three Gorges, Huadian and Datang as the representative enterprises have come into being. Measures are being taken to actively develop the hydrogen power industrial cluster.

- The #5 unit of Hualong #1 Fuqing Nuclear Power Plant has been successfully connected to the grid, breaking the overseas technical monopoly in nuclear power
- Fujian Three-gorges Offshore Windfarm Industrial

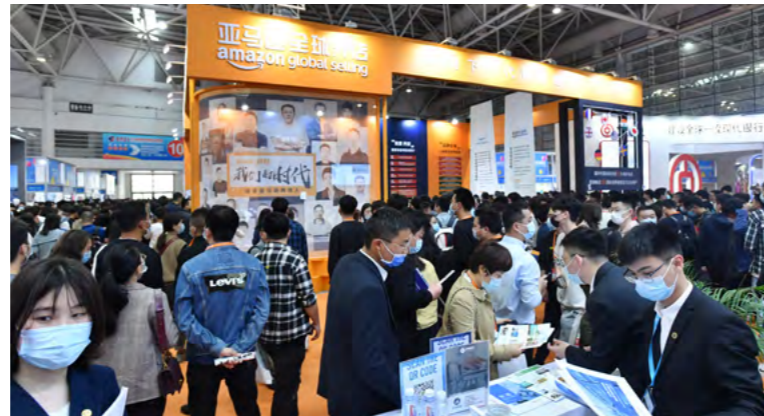

## MODERN SERVICE INDUSTRY

Fuzhou is one of the Chinese cities with the most advanced commodity retailing. Modern service industry is the key support and new source of growth for Fuzhou's national economy.

### Fast development of cross-border e-Commerce

Totally 4 9610 monitoring points have been opened. Fuzhou's cross-border e-Commerce public service platform B2B2C service system has been established. The first charter flight of freighter (Fuzhou-Los Angeles) and the cross-strait direct shipping line have been launched.

First session of China Cross-border e-Commerce Fair attracted a multitude of exhibitors and visitors.

### Gradual establishment of supply chain system

A series of paradigm enterprises, including Pupu e-Commerce, Pipix and 1233 Global Consumer Product Supply Chain, have come into existence. A series of leading vehicle-free carriers, including Haoyunlianlian, Easylinkin and WBTECH, have been fostered.

1233 Big Data Visual Center

### All-around development of service industrial projects

A series of featured service industrial parks have been established, including Enabling Center of China (Fuzhou) Cross-border e-Commerce Comprehensive Pilot Zone, Cangshan District Internet Town, Innovation Park of Hi-tech Zone and Live Broadcast Internet Industrial Base of Binhai New City, Changle.

Cangshan Internet Town

### Multidimensional development of trade, Commercial and retailing industry

Develop Dongjiekou, Dong'erhuan Taihe, Pushang Aegean Sea, Suwanbao and other key business districts; 15 model blocks of night economy have been established and launched into operation.

Dongjiekou Business District

### Continuous expansion of the e-Commerce industry

Promote the new business mode of Internet celebrity economy and Fuzhou's featured business district culture; hold Maritime Silk Road Cloud Live Broadcast Festival, 1688 Live Broadcast and other special events.

Cloud Live Studio of online Maritime Silk Road Exposition & Cross-Straits Fair for Economy and Trade

### Innovation and upgrading of the logistics industry

Fuzhou was successfully included in the list of "national pillar cold-chain logistics bases". It has 6 Class 5A logistics enterprises, the only Class 5A network cargo transportation enterprise in Fujian Province, 1 state-level model logistics park and 3 provincial-level model logistics parks.

INNOVATION-DRIVEN  
INDUSTRIAL GROWTH

04 »

According to the "Fourteenth Five-year Plan" and the development goals of 2035, Fuzhou is working actively for accelerated quality development and trying to deeply integrate itself into the new development conditions of the country. It is focusing on the development of "six major cities" and five major international brands and trying to realize stable economic growth and social security and harmony and turn itself into a modern international city of socialism.

## CONSTRUCTING THE "SIX KEY TOWNS", UPGRADING PROVINCIAL CAPITAL CITY'S POWER

### A FUZHOU BINHAI NEW TOWN

With a planned area of 188sqkm, it is located in the southeastern coastal region of downtown Fuzhou. Its core area covers 86sqkm. Such emerging areas as Southeast Big Data Industrial Park, Near-airport Economic Zone, Songxia Port Zone and Tianjin University International Campus have been established. It is also planned to develop such areas as Eastern Railway Station Advanced Manufacturing Area, Central Business District (CBD) and Staff and Faculty City; Gather 388 industrial enterprises above the prescribed scale with an annual industrial output of over 250 billion Yuan, wherein new-generation IT (including "cloud, big data, IoT, AI and block chain"), precision medicine, platform economy, network audio/video and other modern service industrial projects and industrial park projects will be preferentially developed in the Southeast Big Data Industrial Park with an aim to promote the integrated development of big data and relevant industries. So far, over 600 enterprises have settled down here with a total registered capital of about 51.2 billion Yuan. Over 65,000 racks have been completed and are under construction, accounting for over 43% of the provincial total and making it one of the regions with the highest concentration of big data industry in Fujian. The near-airport economic zone has been approved as a state-level model zone of near-airport economy where a series of key industrial enterprises have been founded, including Netdragon Websoft, Bonade Steel Structure, etc. Cainiao, JD.com and other famous enterprises have also settled down here and there are 269 enterprises above the prescribed scale today.

► Fuzhou Binhai New Town

### B FUZHOU UNIVERSITY TOWN

With a planned covering area of about 104sqkm, it is located in the west of downtown Fuzhou and includes three areas, i.e. the university city area, Shangjie area and Fuzhou Hi-tech Zone (Fuzhou Hi-tech Zone has a jurisdiction of 68sqkm and Minhou has a jurisdiction of 36sqkm). Through improvement of landscapes of key areas and roads and renovation of infrastructures of the university city area, the goals of "six topnotch" will be achieved to turn it into a topnotch university city ideal for studying, working, dwelling and tourism. Measures will also be taken to gradually promote the construction of China Southeast (Fujian) Science City on the basis of Fuzhou University Town.

► Fuzhou University Town

## C SOUTHEAST AUTO TOWN

With a planned covering area of 2,812.9 hectares, a construction plot area of 2,349.71 hectares and an industrial plot of 608.61 hectares, it is located in Qingkou Group of Minhou County and includes Qingkou, Xiangqian and Shanggan Towns. Focus will be placed on the development of new-energy vehicle industry and attraction of auto making and auto-related industrial chain projects with an aim to establish an industrial concentration zone of auto making, sale and service.

Qingkou Investment Zone

## D MARITIME SILK ROAD SEAPORT TOWN

Located in Jiangyin, Fuqing, it is expected to strengthen the featured industries of Jiangyin Port City and establish an industrial structure where new chemical material industry plays a leading role and biopharmaceutical and clean energy equipment manufacturing play a secondary role, with one 100B-Yuan and two 10B-Yuan industrial clusters. The port infrastructures will be further improved, including road, communication, water supply, power supply, heat supply, dorm, school, commercial complex, hospital, etc, to improve the carrying capacity and service level of Jiangyin Port City. Measures will be taken to construct terminals and open new routes as the base for the development of a world-class port. Avail the advantageous resources of the deep-water port of Jiangyin and the port railways to actively turn Fuzhou into a regional comprehensive logistics hub.

Jiangyin Port City Economic Zone

## E FUZHOU (CHANGLE) INTERNATIONAL AIRPORT TOWN

According to the plan of the Near-airport Economic Zone, preferentially develop high-end equipment manufacturing, air cargo transport, maintenance, service and other near-airport industries. The Near-airport Economic Zone has a total planned area of about 145sqkm, including Changle International Airport in an area of about 18.3sqkm. The scope of planning extends to the coastal protection forest in the east, the planned Changlin Road in the south, Wensong Road, Zezhu Road and Nanyang Mountain in the west and the planned Linkong Branch Road in the north. An industrial city with "one core and four zones" will be established. Such one core refers to Changle International Airport and such "four zones" include airport and logistics zone, industrial concentration zone, modern service zone and urban functional zone.

Effect drawing of Phase II project of Fuzhou Changle International Airport

## F FUZHOU MODERN LOGISTICS TOWN

With a total planned area of 62.2sqkm and a core area of 26.9sqkm, it is located in Danyang Town, Liangjiang County and designed to include "one belt, one center and two groups". Focus will be placed on establishing a "1+2+N" industrial system ("1" refers to modern logistics industry that has railway cargo transportation hub as the core; "2" refers to the development of green agricultural product trading and food processing industry and green architectural industry; "N" refers to the expansion of headquarters economy, digital economy and N upstream and downstream featured industries).

The goal is to develop a Maritime Silk Road international logistics passage and gateway, a key national carrier of logistics hub, a southeastern regional logistics distribution center and a model of modern smart logistics.

Effect drawing of Fuzhou Modern Logistics Town

# CULTIVATING THE FIVE BRANDS, ENHANCING INTERNATIONAL RECOGNITION AND INFLUENCE

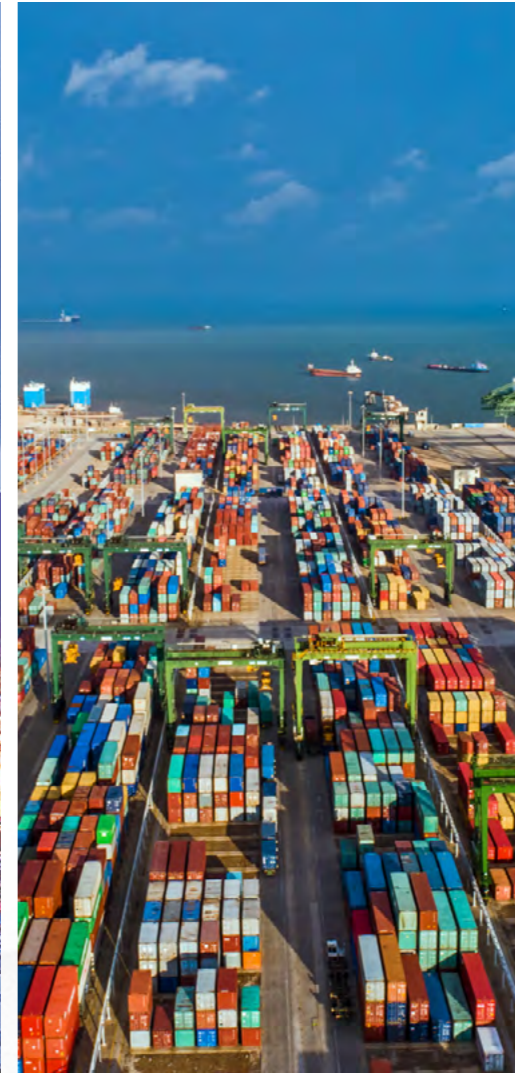

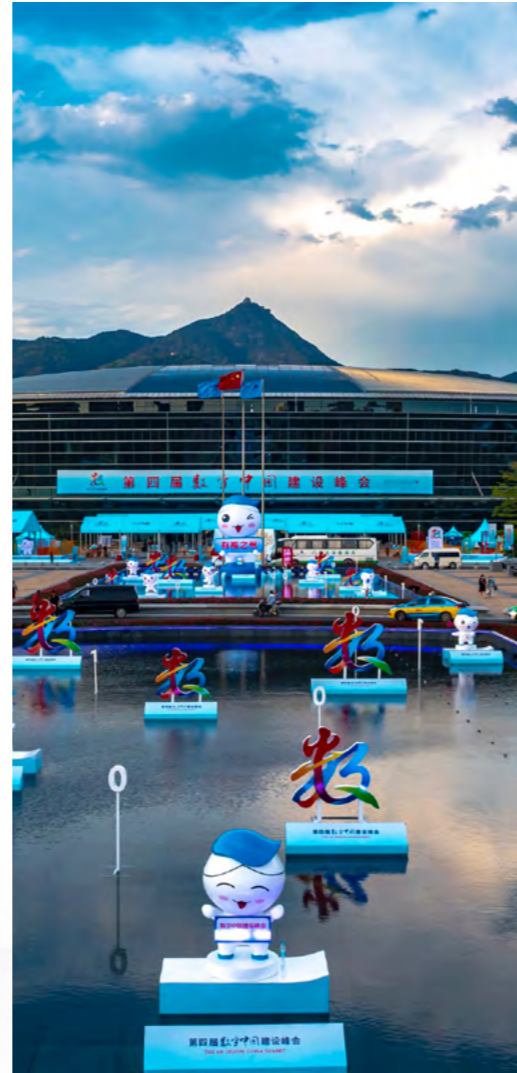

Maritime Fuzhou

Digital Fuzhou

New Materials

Seaports and Airport

Mindu Culture

## Marine Fuzhou

Facilitate the construction of the national model zone of maritime economic development; promote the market-oriented distribution of marine resource elements; make innovations on marine-related financial service mode and improve the smart ocean system; promote the construction of the "marine farm" and the use of "one hundred 10,000t" distant-sea breeding equipment; aggressively develop refined and deep processing of aquatic products to increase the added value of products; develop near-port advanced manufacturing industry; foster the cruise vessel economy and expand such new business modes as marine leisure tourism and cultural experience.

● LianjiangQida Offshore Farm

## Digital Fuzhou

Promote the fast development of the digital industry and the digitalization and intelligentization of the industry. Continue to hold the Digital China Summit, integrate into the construction of the National Pilot Zone (Fujian) for Digital Economic Innovation and Development, foster and develop the cloud computing, big data, IoT, AI and block chain industrial clusters. Promote the innovation-driven development of industrial Internet, deeply implement the intelligent manufacturing initiative and give rein to the role of platform economy. Develop Fuzhou as the "No. 1 Chinese city in Digital Application", promote the construction of "city brain" and implement pilot projects of big data for health and medical treatment and pilot projects of new-type infrastructures.

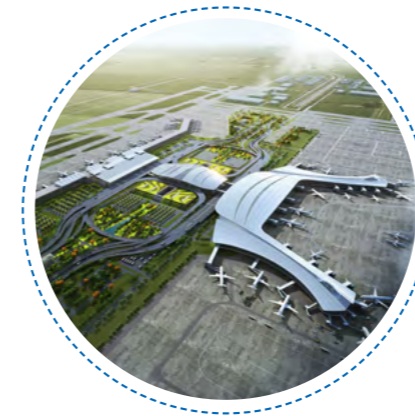

● Digital China Conference and Exhibition Center

## New Materials

Avail the existing industrial base to preferentially develop high-performance membrane, special-purpose glass, functional ceramics, graphene, new textile material and other functional materials; actively develop new-type alloy, engineering plastics, high-quality special-purpose steel and other materials with an advanced structure; develop a highland for the innovation-driven development of new-type material industry; and construct a national strategic industrial cluster of new-type functional materials.

● Fujian Kuncai Chemical

● Effect drawing of Phase II project of Fuzhou Changle International Airport

## Seaport And Airport

Facilitate the construction of high-speed railways connected to the airport and the expansion of the Phase II project of the airport with an aim to combine the advantages of high-speed railway and airport, increase the efficiency of the airport and develop Fuzhou (Changle) International Airport City. Facilitate the construction of a series of park-oriented and port-connected special railway lines to improve the cargo distribution system; construct Jiangyin Port City and Luoyuan Bay Port City to enhance the competitiveness of Port of Fuzhou and turn it into a port city of the Maritime Silk Road. Promote the construction of WenFu and ChangFu High-speed Railways and develop a regional transportation hub linking to the Yangtze River Delta, the Pearl River Delta and the Yangtze Economic Belt.

## Mindu Culture

Held the 44th World Heritage Conference; develop the model for protection of "Fuzhou's old residences"; continuously improve the Three Lanes and Seven Alleys, Shangxiahang, Mount Yantai and other historic and cultural blocks; promote the inscription of "Maritime Silk Road: Historic Relics in Fuzhou" and "Shipbuilding Industry" in the list of cultural heritages; increase the publicity of "Fuzhou Jasmine Flower and Tea Culture System" as an important global agricultural heritage; mine Shoushan Rock culture, Tanshishan Culture and other resources; emphasize the succession to Min Opera, Min cuisine and other traditional techniques; tell good stories of Fuzhou; and establish a Mindu culture succession system.

## FUZHOU AREA OF CHINA (FUJIAN) PILOT FREE TRADE ZONE

With a planned covering area of 31.26sqkm, it includes the three blocks of Mawei, Cangshan and Fuqing. Totally 230 innovative measures in 17 batches have been introduced, including 79 creative measures in China; it is also the first in China to introduce the service of "3-in-1 certification & one code for one license"; it was approved by the State Council as one of the first few "model zones of Internet market regulation and service" in China.

With a planned covering area of **31.26** (sqkm)

### → Mawei block

With a covering area of 17.4sqkm, it has established the industries of marine fishing, bulk aquatic product trading, international navigation, cultural tourism, electronic information, technological financing, R&D and design, near-port logistics, Taiwan-related logistics and Taiwan-related tourism.

### → Cangshan block

With a covering area of 4.6sqkm, it has established the industries of professional exhibition and trading, cross-border e-Commerce, health, culture and tourism, scientific innovation service and financial service.

### → Fuqing block

With a covering area of 9.26sqkm, it has established the industries of international shipping, near-port modern logistics, bulk cotton trading, auto trading, marine biological product processing, light industry and textile manufacturing.

## INNOVATION, START-UP AND CREATION HI-TECH INDUSTRIAL PARK

### → Donghu Innovation, Venturing and Creation Hi-tech Industrial Park

Based on Southeast Big Data Industrial Park, it has a planned covering area of about 9.2sqkm. Measures are taken to aggressively attract 10 industries, including IoT, precision medicine, 5G, intelligent Internet-connected vehicle, IC, AI, new-type display, big data, intelligent equipment, marine and aviation engineering equipment.

● Southeast Big Data Industrial Park

### → Jin'anhu Innovation, Venturing and Creation Hi-tech Industrial Park

With a planned covering area of 4sqkm, it will focus on the optoelectronic industry and develop into a quality ecological smart industrial park for the concentrated development of three major industries, i.e. urban emerging industry, innovative industry and smart manufacturing industry.

● Effect drawing of Jin'anhu Innovation, Venturing and Creation Hi-tech Industrial Park

### → Qishanhu Innovation, Venturing and Creation Hi-tech Industrial Park

**01 Minhou Area:** with a planned covering area of 36sqkm, it has Fuzhou University City as the core of innovation and actively develops such new business modes and industries as digital cultural creation, smart manufacturing and platform economy with an aim to become the "intelligence valley of Fuzhou".

**02 Hi-tech Zone:** with a planned covering area of 14sqkm, it has digital economy as the leading industry and biopharmacy and optoelectronic industries as the prevailing industries and will foster and develop the three emerging industries of AI, 5G and industrial Internet and block chain with an aim to become the "scientific innovation city of Fuzhou".

● Effect drawing of Qishanhu Innovation, Venturing and Creation Hi-tech Industrial Park

**"One Sub-Park, Six Zones" of Fuzhou Software Park**

With a construction area of 12.33 million square meters and a covering area of 9,000mu, it will preferentially develop software and IT service industry. It includes the core park of Fuzhou Software Park and six branch parks in Hi-tech Zone, Cangshan District, Jin'an District, Minhou County, Lianjiang County and Yongtai County. The Core Park of Fuzhou Software Park is one of the twelve national software industrial bases approved by the Ministry of Science and Technology and an important concentration zone of IT industry on the western coast of the Taiwan Strait.

**Fuzhou Hi-tech Industrial Development Zone**

It has two core parks, i.e. Haixi Hi-tech Industrial Park and Biopharmaceutical and Electromechanical Industrial Park. Haixi Hi-tech Industrial Park has a planned construction area of 12.35sqkm. High-end R&D, scientific and technological incubation and headquarters economy will be preferentially developed. The Biopharmaceutical and Electromechanical Industrial Park has a planned construction area of 12.87sqkm. Biopharmaceutical, electromechanical, optoelectronic, precision machinery and other hi-tech industries will be preferentially developed.

**Qingkou Investment Zone (Minhou Qingkou Automotive Industrial Park)**

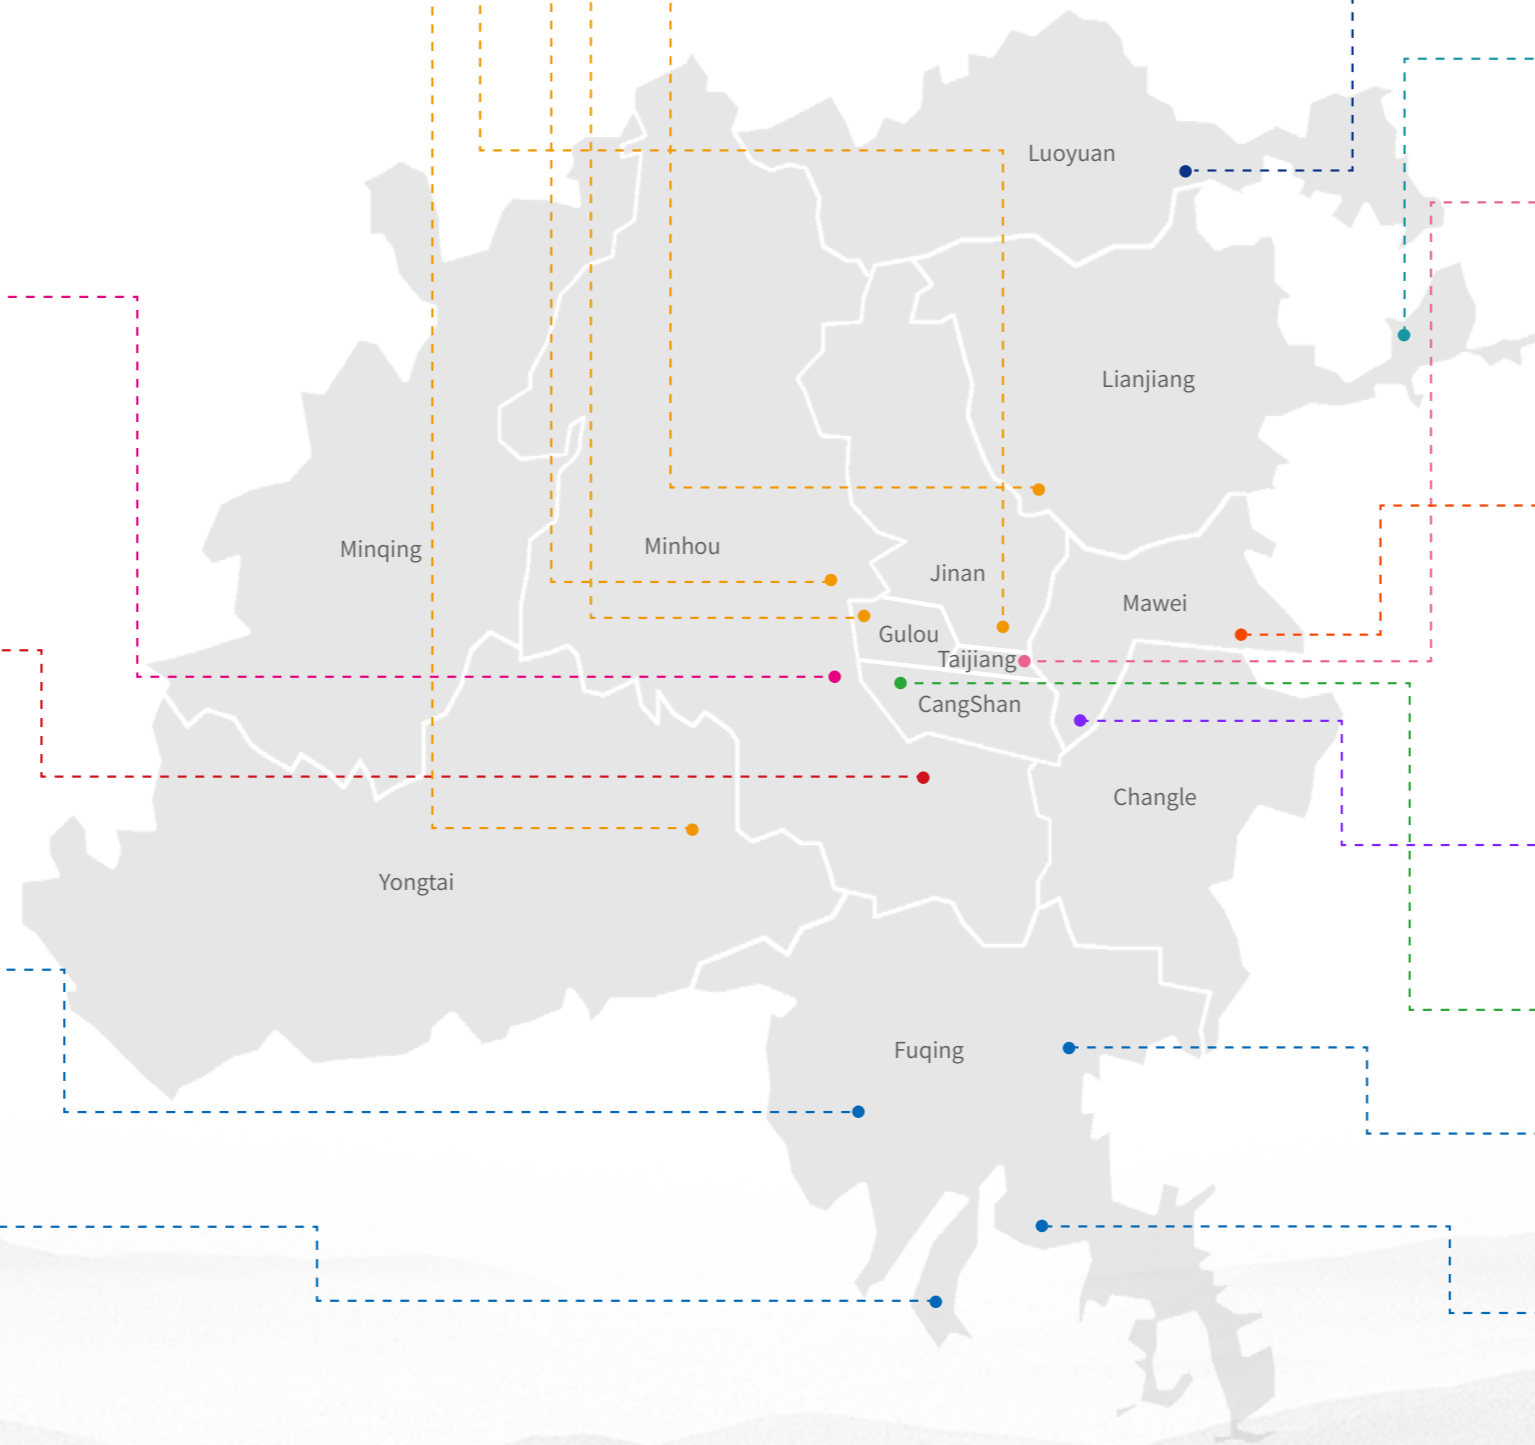

With a planned covering area of 56sqkm and an industrial plot of 16sqkm, it is a provincial-level auto industrial zone where the preferred projects include new-energy auto making, "electric drive, battery and electric control" systems and accessory component enterprises as well as projects of transmission case, safety bag, ternary catalyst, auto electronic system and other accessories of a conventional fuel-driven vehicle. It is expected to become a new-energy vehicle and auto part manufacturing base.

**Fuqing Rongqiao Economic and Technological Development Zone**

With a planned covering area of 10sqkm, it is the national display industrial park, the national model base of new-type industrialization (electronic information: display) and the national hi-tech industrialization base of flat-panel display. Electronic information, precision auto part, optical and relevant other industrial chains will be preferentially developed.

**Fuzhou Jiangyin Port Economic Zone (Fuqing Jiangyin Economic Development Zone)**

With a planned covering area of 168.95sqkm, the zone will preferentially develop near-port petrochemical, marine, equipment manufacturing, international shipping and logistics, auto making, auto part import and export, bulk commodity distribution, bonded warehousing, logistics and display, financial leasing and other modern service industries to make Fuzhou a well-furnished modern port city.

**Fuzhou Taiwan Investment Zone**

With a planned covering area of 13.26sqkm, it will preferentially attract smart equipment manufacturing, auto part, new energy, new material and Taiwanese projects.

**Kemen Economic Development Zone**

The zone has a planned total covering area of 340sqk and its central zone has a planned covering area of 95sqkm. New chemical material industry will be preferentially developed.

**Fuzhou Haixi Modern Financial Center Zone**

It was founded upon approval of the People's Government of Fujian Province in 2014 and has a planned covering area of 15sqkm, including Taijiang District Strait Financial and Commercial District and central business district on the Northern Bank of the Min River. The preferred projects include banks, insurance companies, securities brokerages, funds and other financial institutions; e-Commerce, IoT, smart cloud service and other "innovation and venturing" enterprises; headquarters economy, regional, R&D and clearing headquarters, modern service industry, etc.

**Fuzhou Comprehensive Bonded Zone**

With a covering area of 0.659sqkm, it is the second enclosed comprehensive bonded zone in Fujian Province and the first one in Fuzhou. The preferred industries include bonded processing, bonded logistics and bonded service industries and the preferred businesses include optical processing and manufacturing, cross-border e-Commerce online shopping and bonded import, supply of lubricants to international vessels, supply of marine spare parts to international vessels, bonded warehousing and logistics of chromite, cold-chain logistics and other services. R&D, testing and bonded maintenance services are also preferred here.

**Fuzhou Economic and Technological Development Zone**

With a planned covering area of 23sqkm, it is the national model base of new-type industrialization (IoT). IoT and new-type auto electronics industry will be preferentially developed.

**Fuzhou Jinshan Industrial Park**

The park has a planned covering area of 8.07sqkm and preferentially develops electronic information and smart manufacturing industries.

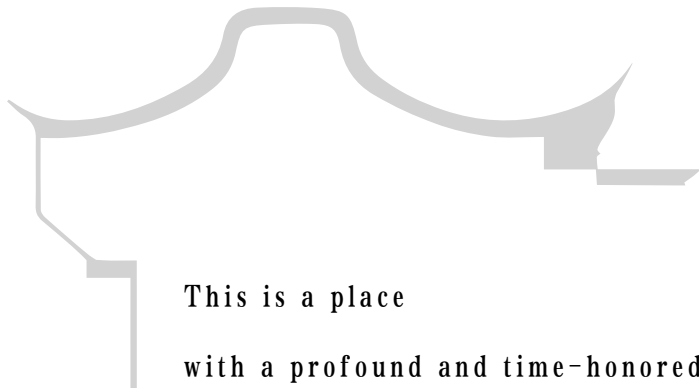

**Fuqing Functional Zone of Fuzhou New Area (Fuzhou Yuanhong Investment Zone)**

The zone has a planned covering area of 40sqkm. Yuanhong International Food Industrial Park and grain, oil and food industry will be preferentially developed.

**Fujian-Taiwan (Fuzhou) Marine Economy and Industrial Park**

With a planned covering area of 65sqkm, the park preferentially develops refined and deep processing of aluminum, electronic material, intelligent manufacturing and intelligent service, near-sea machinery and equipment manufacturing, marine biology, new-energy vehicle and auto part industries.

This is a place  
with a profound and time-honored history of study.

The Three Lanes and Seven Alleys is the origin of many historic celebrities  
and the live fossil of the Chinese neighborhood system.

This is

Fuzhou, the city of luck and happiness

and the capital city with a millennial history and unlimited business opportunities.
